GS R5522 Ruglove MK III Barcode Scanner

Top-Tier Grip Comes from the Unmatched "Bare Palm" Holding Ability

The ingenious hand mount on the back provides a completely unrestricted palm. This design stands out from other back-of-hand scanners that typically involve a bulky strap or cover the palm entirely. Workers achieve a more secure grip on items by this completely bare palm, ultimately enhancing productivity and minimizing breakage.

Enhanced User Comfort with Customizable Trigger Button Placement

Users can customize the placement of the trigger button to suit their daily habits, ensuring comfort even during prolonged use. This flexibility allows for a tailored experience that promotes user comfort and convenience throughout extended periods of operation.

Prevent the Spread of Germs with Easily-Changed Comfortable Glove

Since the glove is the only part of this wearable device that touches skin, we created the two-piece design that separates the glove from the scanner body, providing the option to give each worker their own glove. Additionally, the material of the glove is soft enough to provide comfortable fit.

Scan Engine, Zebra SE4750MR

Data capture capabilities of it is comprehensive. It can capture 1D and 2D barcodes in milliseconds, from high resolution photos, to letter, legal, A4 and A5 documents that are fully searchable and editable. There is no need to ever align the bar code and imager for highly intuitive and rapid bar code capture.

Lightweight Designed Industrial Scanner Ensures Efficient Inventory Management

Thanks to its lightweight design, this scanner is effortless to carry and operate, rendering it perfect for on-the-go work settings. Whether in warehouses, on production lines, or in retail spaces, users can effortlessly transport and utilize this device with ease.
