Laser Safety

Do not stare into the laser beam or view directly with optical instruments.
Battery Safety

- Do not immerse or expose to water or other liquids, or expose to fire, explosion, or other hazard.

- Do not disassemble or open, crush, bend or deform, puncture, or shred.

- Do not short circuit a battery or allow metallic or conductive objects to contact the battery terminals.

- Do not use the battery if it is bulging, deformed or damaged.

- To charge the mobile device battery, the battery and charger temperatures must be between +32 ºF and +104 ºF (0 ºC and +40 ºC).

- Do not use batteries other than those provided by GENERALSCAN, otherwise we will not be responsible for the consequences.

- Dispose of batteries according to instructions.

- Please follow local regulations to promptly dispose of used rechargeable batteries.
